

Table A — Ranking on the paper's six-benchmark suite

Average accuracy (%) over MedReason Table 4. Highlighted rows measured here; all others transcribed from the paper.

Excluded from this table: MedReason-8B.

Backbone shown with its published values (Huatuo-o1-RL-8B), not the score measured on this harness.

Harness offset measured on the untouched backbone: +2.89 pt vs the published protocol. Subtract it before reading our-vs-published gaps.
