

## Table B — brainmed-8b-v1\_\_best vs Huatuo-o1-RL-8B

Accuracy (%). Published values from MedReason Table 4; our column measured by this pipeline.

| Benchmark | Huatuo-o1-RL-8B (published) | brainmed-8b-v1__best (measured) | Delta     |
|-----------|-----------------------------|---------------------------------|-----------|
| MB-op4    | 55.20                       | 56.49                           | +1.29 win |
| MB-op5    | 51.30                       | 50.65                           | -0.65     |
| MedXpert  | 16.70                       | 17.81                           | +1.11 win |
| MedQA     | 72.60                       | 72.58                           | -0.02     |
| MedMCQA   | 60.40                       | 60.22                           | -0.18     |
| PubMedQA  | 79.20                       | 77.70                           | -1.50     |
| Average   | 55.90                       | 55.91                           | +0.01 win |

Excluded from this table: MedReason-8B.

Backbone shown with its published values (Huatuo-o1-RL-8B), not the score measured on this harness.

Harness offset measured on the untouched backbone: +2.89 pt vs the published protocol. Subtract it before reading our-vs-published gaps.

Wins on 2 of 6 benchmarks.
