

## Table B — brainmed-8b-v1\_\_epoch-1 vs Huatuo-o1-RL-8B

Accuracy (%). Published values from MedReason Table 4; our column measured by this pipeline.

| Benchmark | Huatuo-o1-RL-8B (published) | brainmed-8b-v1__epoch-1 (measured) | Delta            |
|-----------|-----------------------------|------------------------------------|------------------|
| MB-op4    | 55.20                       | 55.52                              | +0.32 <b>win</b> |
| MB-op5    | 51.30                       | 50.00                              | -1.30            |
| MedXpert  | 16.70                       | 15.87                              | -0.83            |
| MedQA     | 72.60                       | 70.62                              | -1.98            |
| MedMCQA   | 60.40                       | 59.77                              | -0.63            |
| PubMedQA  | 79.20                       | 77.50                              | -1.70            |
| Average   | 55.90                       | 54.88                              | -1.02            |

Excluded from this table: MedReason-8B.

Backbone shown with its published values (Huatuo-o1-RL-8B), not the score measured on this harness.

Harness offset measured on the untouched backbone: +2.89 pt vs the published protocol. Subtract it before reading our-vs-published gaps.

Wins on 1 of 6 benchmarks.
